Summary

Full-Stack MERN Developer and Computer Science graduate (BS, 2026) with two development internships and an agentic AI final year project, building responsive, API-driven web applications with role-based dashboards. Skilled in React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, RESTful APIs, and JWT authentication and authorization, with experience integrating OpenAI, Supabase, and Pinecone.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C, C++, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Component-Based Architecture

Backend: Node.js, Express.js, FastAPI, RESTful APIs, API Integration, JWT & OTP Authentication, Authorization

Databases: MongoDB, PostgreSQL, MySQL, Supabase

AI Integration: OpenAI API, Agentic AI (Multi-Agent Systems), Vector Embeddings, Pinecone

Concepts: Full-Stack Development, Software Architecture, Service-Oriented Architecture, UML, Debugging

Tools & Cloud: Git, GitHub, Postman, VS Code, Vercel, AWS, Cursor, Claude Code, GitHub Copilot

Experience

MERN / Next.js Development Intern **Sep 2026 – Present**

XICTEK Systems *Lahore, Pakistan (Remote)*

- Developing MedNovi-AI, an AI-powered healthcare platform with 2 role-based dashboards (patient and doctor), using Next.js and React.js.
- Built responsive interfaces and reusable components; integrated Supabase as a Backend-as-a-Service for database, authentication, and backend services.

MERN Stack Development Intern **Dec 2025 – Feb 2026**

U DEVS *Lahore, Pakistan (Remote)*

- Developed a responsive e-commerce web application using React.js and Tailwind CSS for desktop and mobile devices.
- Implemented shopping cart functionality and 3 dashboards (product, order, and customer management).
- Built reusable React components and responsive layouts to ensure a consistent user experience across screen sizes.

Projects

Recruiter: Agentic AI Recruitment System (FYP) | *React.js, FastAPI, PostgreSQL, Pinecone, OpenAI API*

- Built a multi-agent AI recruitment platform that automates screening, candidate-job matching, and shortlisting workflows.
- Developed recruiter and candidate interfaces with React.js and Tailwind CSS, connected to a FastAPI backend through secure REST APIs with JWT and OTP authentication.
- Engineered AI-powered candidate-job matching using vector embeddings and Pinecone, with PostgreSQL for structured data.
- Integrated the OpenAI API for resume parsing, personalized candidate messaging, and explainable shortlisting; documented the layered, service-oriented architecture with UML diagrams.

Personal Portfolio | *React.js, Tailwind CSS, Vercel*

- Designed and deployed a responsive portfolio showcasing projects, skills, and certifications, with smooth navigation and interactive UI components.

MERN User Authentication System | *MongoDB, Express.js, React.js, Node.js*

- Built user registration and login with MongoDB storage, a React.js frontend, and a Node.js/Express.js REST API.

Education

University of Central Punjab **2022 – 2026**

Bachelor of Science in Computer Science, CGPA: 3.46 *Lahore, Pakistan*

Certifications

AWS Academy Cloud Foundations, AWS 2025

Web Development Course (3 Months), Peak Solutions College 2024
